Question 1 | Correct Mark 1.00 out of 1.00

Given two arrays array_One[] and array_Two[] of same size N. We need to first rearrange the arrays such that the sum of the product of pairs (1 element from each) is minimum. That is SUM (A[i] * B[i]) for all i is minimum.

For example:

Input	Result
3	28
1	
2	
3	
4	
5	
6	

Answer: (penalty regime: 0 %)

```

1  #include <stdio.h>
2
3  void sort(int a[], int n)
4  {
5      int i, j, temp;
6
7      for (i = 0; i < n - 1; i++)
8      {
9          for (j = 0; j < n - i - 1; j++)
10         {
11             if (a[j] > a[j + 1])
12             {
13                 temp = a[j];
14                 a[j] = a[j + 1];
15                 a[j + 1] = temp;
16             }
17         }
18     }
19 }
20
21 int main()
22 {
23     int n, i;
24     int a[100], b[100];
25     int sum = 0;
26
27     scanf("%d", &n);
28
29     for (i = 0; i < n; i++)
30         scanf("%d", &a[i]);
31
32     for (i = 0; i < n; i++)
33         scanf("%d", &b[i]);
34
35     sort(a, n);
36     sort(b, n);
37
38     for (i = 0; i < n; i++)
39         sum = sum + a[i] * b[n - 1 - i];
40
41     printf("%d", sum);
42
43     return 0;
44 }
45

```

	Input	Expected	Got	
✓	3 1 2 3 4 5 6	28	28	✓
✓	4 7 5 1 2 1 3 4 1	22	22	✓
✓	5 20 10 30 10 40 8 9 4 3 10	590	590	✓

Passed all tests! ✓

Correct

Marks for this submission: 1.00/1.00.
